## SAVOX® C-C400 Com-control

### Push-To-Talk unit

The SAVOX® C-C400 Com-control is a durable Push-to-Talk unit that enables the use of a two-way radio in extreme and hazardous conditions. The extra large push-to-talk button secures transmission, even used from underneath gear and protective clothing - allowing full concentration on the actual task. The unique design prevents unintentional transmission and enables mounting directly on the radio - eliminating all redundant running of cables. Alternatively the unit can be fastened by a detachable belt or clothing clip. The integrated quick release connector adapts any SAVOX® headset to your two-way radio.

The SAVOX® C-C400 com-control contains an integrated amplifier for bone conduction and ear microphones and interface electronics according to the type of radio used. The SAVOX C-C400 Com-control push-to-talk button is available in different colors, with an option for extra sensitive operation (mushroom) or for remote PTT-function.

The SAVOX® C-C400 Com-Control is a compact, durable, and intrinsically safe radio accessory. A Push-To-Talk solution that provides personal safety and work efficiency - whatever the conditions.
